Avoid – Shift – Improve profile

In their own words

"To minimize the GHG emissions of the surface transport sector through both demand and supply side management by upgradation of the emission norms of ICE vehicles, adoption of electric vehicles (100% light vehicle and bus sales to be EVs by 2045 and 25% heavy vehicles (freight) imports to be EVs by 2050) and use of shared mobility, public transport, and non-motorized transport."
