In their own words

“Malaysia intends to achieve an absolute reduction of 15–30 million tonnes of CO₂ equivalent (MtCO₂eq) by 2035 from the peak level. This comprises an unconditional reduction of up to 20 MtCO₂eq, with a further 10 MtCO₂eq reduction conditional upon the provision of climate finance, technology transfer, and capacity-building support from international sources.”

Third Generation NDC, NDC 3.0, p. 1
